...omitted...

[0036] The keyboard 2410 and the mouse 2420 that serve as instruction entering means enter an instruction issued by a user, for example, an instruction to perform an operation at the time of production of BML contents or an instruction to control reproduction of BML contents and transmit the instruction to the CPU 2110.

...omitted...

[Fig. 2] Fig. 2 is a diagram illustrating the configuration of a computer system that constructs a contents production/verification device according to the embodiment of the present invention, a contents production device, and a contents reproduction device.
